Want your eyes to pop like Debra's? Before applying eye shadow, rim your lash line with a brown kohl eye pencil for extra definition!

Our experts answer your most pressing q

Q Which eye shadow colors are trendy this fall?

A "Opt for darker colors like forest green, gunmetal or eggplant," says Athens, Ga.-based makeup artist, and CEO of JennySue Makeup, Jennifer Duvall. "Deeper hues always tend to be a fall favorite — they add rich color, which enhances the eyes, but also have a neutral element, keeping eye shadow from appearing too dramatic." Get the best look by rimming shadow along your upper and/or lower lash line for a smudgy eyeliner effect, then top it off with a few coats of mascara!

Expert Tip:

Use a damp brush to apply eye shadow. This will intensify the color and help set the formula for all-day wear!

Q I have the worst crow's-feet around my eyes, and makeup only seems to enhance them. How can I hide them?

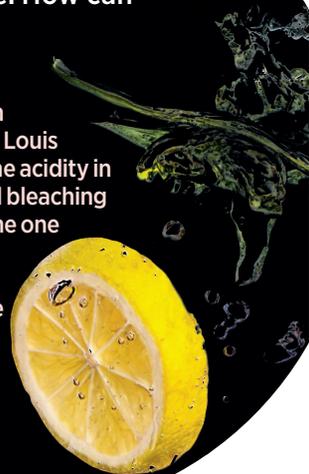

A "Unfortunately, you cannot completely conceal crow's-feet, but you can soften their appearance by applying a skin primer after your moisturizer!" says Duvall. "Skin primers help reduce the appearance of fine lines and wrinkles by plumping up the skin to prevent makeup from settling into creases." After applying moisturizer, dab primer all over skin, then for maximum effect, dab more directly onto problem areas for even more coverage. Let it set, then finish by applying foundation and blush as you normally would!

Q I dyed my hair, and now I have stains along my hairline. How can I get rid of them?

A "Lemon juice will do the trick!" says Staten Island, N.Y.-based hairstylist Louis Fedele of Bamboo Salon. "The acidity in lemon juice acts like a natural bleaching agent, lifting stains." Combine one teaspoon baking soda with one tablespoon lemon juice, then rub the mixture onto skin with a damp washcloth until the stain disappears.

g questions so every day can be gorgeous

Q The change in weather has made my skin oily and my pores enlarged. Now I'm breaking out. What can I do?

A Try a red clay mask! Red clay is a great ingredient for improving skin tone and complexion. It draws out impurities, which clears and prevents blemishes, and shrinks pores. What's more, red clay is stronger and more oil-absorbing than other clays, which makes it ideal for oily skin types! Apply a thin layer onto clean, dry skin, letting it sit for about 20 minutes, or until dry to the touch, then gently peel off. Rinse off any excess with warm water, then pat face dry. Use twice a week for best results!

Q The color of my lipstick is never as rich as I'd like it to be. Any suggestions?

A Yes, prep lips with foundation first — it's that easy. "This will cancel out the tone of your natural lips, creating an even base that not only maintains the true color of lipstick, but helps the shade appear brighter and more pigmented," says Duvall. Coating lips with foundation will also prevent lipstick from sinking into the skin, making color more vibrant longer. Dab a small amount of foundation onto clean lips, then once it dries, top it with your favorite lip color. Your pout will look perfect!
